

Umair Kaleem

ML | AI

Accomplished Data Analyst with extensive hands-on experience in data cleaning, preprocessing, and advanced analysis. Proven track record of managing multiple data cleaning projects, transforming messy datasets into high-quality, actionable insights using tools like Python (Pandas, NumPy), SQL, Excel, and visualization libraries (e.g., Matplotlib, Tableau). Skilled in identifying patterns, handling large volumes of data, and delivering precise results to support data-driven decision-making.

House #74, Street #01, Block B, Multi Gardens, B-17, Islamabad

EDUCATION

Bachelor in Artificial Intelligence | 2024 - continue

SS CASE IT, B-17, Islamabad

- Relevant Courses/languages: Python, R, HTML, CSS, C++(DSA, OOP), SQL, AI
- GPA: 2.9

PROJECTS

Instagram Impressions Prediction Model

Programming for AI

Developed a basic machine learning model to analyze and predict Instagram post impressions.

Used Python and machine learning libraries for data analysis and model training.

E-Commerce Webpage for Small Store

For Database Course

- Designed and developed a responsive e-commerce webpage for a small business. Implemented product display, basic UI components, and responsive layout using HTML, CSS, and PHP

Comprehensive Shopping Mall & User Calculation Management System

Programming fundamentals

- Built a system to manage shopping mall data and perform user-related calculations. Focused on structured programming and data handling.

Fighter Jet Shooting Game

OOP

- Developed a simple shooting game using programming logic and object-oriented concepts. Implemented game mechanics such as player movement, enemy targeting, and score tracking.

CERTIFICATES

- **Fundamentals of Machine Learning and Artificial Intelligence**
Coursera | AWS Partners (Course ID: aws_partners_11276) 2026
- **Search Engine Optimization (SEO)**
University of Education, Jauharabad Campus 2024

TOOLS & TECHNOLOGIES

- Git & GitHub, Streamlit, Docker
- VS Code, Excel, MS Office.
